PROFILE

Full-Stack Software Engineer with 6 years shipping production web apps in TypeScript, React, Next.js and Node.js, and a physician (MD) with 16 years in medicine, the last 11 as an ophthalmologist. AI-native in daily work: Claude Code, team conventions for prompts and AI code review, and agentic MCP workflows. Experienced with BFF architectures, REST & GraphQL APIs, AWS, Docker and CI/CD, LLM integrations (OpenAI, Whisper) and strong testing discipline. I build software that clinicians and patients actually use.

OBJECTIVES

Build AI-native software for healthcare, clinical research and life sciences, where 16 years of medicine meet 6 years of engineering.

HARD SKILLS

TypeScript
React
Next.js
Node.js
GraphQL
MongoDB
AWS
Docker

Claude Code
LLM / MCP
Jest / Vitest
Playwright
Cypress
Keycloak
Vue.js
Tailwind CSS

SOFT SKILLS

Tech leadership
Code review
Agile / Scrum

LANGUAGES

Spanish – Native
English – C2 (Proficient)
Italian – B2 (Intermediate)

EXPERIENCE

Front-End Developer · Technical Lead | SQLI

09/2025 - present | Barcelona - Spain

- IPCOM (isopartner.nl): lead front-end architecture of a headless B2B e-commerce platform on Next.js, TypeScript and a BFF over Payload CMS, Strapi, Vendure and the iHub ERP.
- Set the team's AI-native workflow: Claude Code conventions (CLAUDE.md), reusable prompt patterns, quality gates for AI-generated code and agentic MCP / tool-use flows.
- Audited a BFF migration across 4 repo branches, flagging 12 architectural risks (Keycloak/OAuth auth, feature flags, catalog model); migrating nc2-components from V2 to V3.
- Nespresso (global e-commerce): built scalable React/TypeScript components with modular SCSS, removed layout shifts and delivered WCAG-aligned accessibility (ARIA, semantics).
- Quality & delivery: Jest/Vitest and React Testing Library, E2E with Cypress/Playwright, Docker and GitHub Actions CI, automated visual testing in Agile teams.

Front-End Developer | Henko-AI

02/2024 - 08/2025 | Remote - Spain

- Shipped LLM and speech-AI features to production, integrating OpenAI, Whisper, Gladia and Speech.io APIs into a Progressive Web App.
- Migrated legacy platforms to Next.js, React, Redux, Node.js and Tailwind CSS, with GraphQL and Supabase data layers.
- Built advertising-metrics dashboards and AI-driven campaign suggestions based on predictive analytics.

Front-End Developer (Vue.js) | isEazy LMS

03/2023 - 02/2024 | Remote - Spain

- Evolved and optimized a mobile-first Progressive Web App for an e-learning LMS, focused on scalability.
- Led a full migration from legacy JavaScript (ES5) to Vite, Vue 3, Next.js and Tailwind CSS.
- Delivered features across 14 Agile-Scrum sprints using GitHub PR and code-review workflows.

Software Engineer | atSistemas

03/2022-01/2023 | Remote - Spain

- Automated mission-critical pharmaceutical shipment and payment workflows, increasing operational efficiency.
- Built client web solutions and REST APIs with Node.js, Express and AWS, plus SEO-optimized Next.js apps with SSR and API routes.

MERN-Stack Developer | Freelance

05/2020-02/2022 | Granada - Spain

- Delivered production web apps for 10+ clients, from scoping to deployment, with a focus on scalability and reliability.
- Built full-stack MERN solutions: Node.js, Express, React, Next.js, MongoDB, Supabase, REST APIs and AWS (EC2, S3, DynamoDB, Lambda).

EDUCATION

MERN Developer | OXYGEN Academy

01/2023–04/2023 | Spain - Remote

- Agile delivery across 14 sprints with three weekly meetings and a final product demo.
- Collaborated on private and open-source projects using GitHub workflows (PRs, code review).

Full-Stack Developer | Ironhack

05/2021–08/2021 | Spain - Remote

- Intensive full-stack bootcamp: shipped 10+ web projects and 3 full applications.
- Stack: React, Node.js, Express, MongoDB, Mongoose, REST APIs, JavaScript, HTML, CSS.

Bachelor's Medical Degree (MD) | Barceló Foundation

09/2001–09/2009 | La Rioja - Argentina

- Medical degree officially recognized in Spain (2025); 16 years in medicine, the last 11 as an ophthalmologist.
- Healthcare domain expertise: clinical workflows, patient data, diagnostics (OCT, imaging) and telemedicine, bridging clinicians and engineering teams.
